

Get real-time quality analytics and uncover trends that lead to improved product quality, lower defect rates and reduced retailer chargebacks.

With Quality Pro, it is now possible to centralize all of your production data (suppliers, collections, products, specifications, inspection reports, etc ...) on a single cloud-based dedicated platform, accessible from anywhere and from any device.

According to your data, business rules and acceptable quality levels, Quality Pro generates a structured guided inspection process, exclusive to each type of inspection.

The automated notification system links the various stakeholders who should take action, when necessary. Quality Pro is a simple and user-friendly tool simplifying your suppliers' life all the while enhancing their performance.

Every action captured on the platform is updated and accessible in real time, from anywhere, according to the granted user permissions. With this compilation of reliable data, Pivot88 offers a range of clear and precise analytical charts, enabling you to measure and compare your suppliers' effectiveness over a period, a collection, a product family, a given territory or other. And all this, in real-time!. The possibilities are endless.

Quality Pro, an essential tool to maximize your employees, partners and suppliers' collaboration efforts.
