# Veras Extend
Mobile POS & Inventory

Quickly and painlessly empower any store running Veras CheckOut with mobile capabilities. You can now execute a variety of in-store activities and bring the point of sale to your customers in-aisle or off-site with Veras Extend, the mobile client application for Veras CheckOut.

Expand Your Options and Bring the Power of Mobility and Inventory to Your Store Floor

At a glance:

- Platform flexibility — iOS and Android native
- "Just another register" — seamless integration with Veras CheckOut POS
- Full POS transactions, or suspend and resume the transaction on a traditional POS register
- Public APIs for easy extension to other platforms
- Integration with fixed-lane payment devices or mobile payment units to keep PCI scope isolated to payment devices
- Paper receipts and e-receipts

Benefits

- Address mobile on your terms without disrupting your business
- Visibility into customer data from across channels
- Execute the same promotions and coupons available in CheckOut
- Use a docked tablet rather than traditional POS hardware for more a more flexible and cost-effective cashwrap

Integrate and Operate Like Just Another Register

Every retailer is different, so Veras Extend offers you the flexibility to meet diverse mobility needs while integrating easily and transparently into your existing systems. Extend acts as "just another register," natively using CheckOut's ERP, CRM and payment integrations. You'll see the same prices, promotions as CheckOut for seamless operations via any available network connection. Perform full point-of-sale transactions with secure payment, or suspend the transaction and complete it on a standard POS. Extend goes beyond customer checkout and enables you to use your mobile device for inventory, reporting and look-up activities. With seamless POS and integration to your back office end-of-day processes and central office systems, using Extend is effectively no different than adding another physical register to your store.

Get Cost-Effective Terminal Flexibility In-Store and Off-Site

Mobile platforms provide the flexibility of a cost-effective terminal alternative to a traditional POS system, along with fast setup and teardown. You can conveniently operate an off-site special event or open an extra in-store register just by docking your iPad/tablet for use as a fixed point-of-sale terminal.

Rest Assured with Payment Security

Eliminate potential security and PCI compliance concerns associated with sending customer credit card data over a Wi-Fi network. The Veras strategy keeps credit card information separate from your POS systems, period. Sensitive payment card data never enters Veras Extend or CheckOut. We work with leading payment software providers to deliver best-of-breed payment security, so you won't have to worry about compliance impacts.

Uniquely Focused on Perfecting the In-Store Connection
